Professional Summary

Java backend engineer with 8+ years building enterprise applications and data pipelines across banking, retail, and manufacturing domains. Promoted to Module Lead at Mphasis in March 2025 after three years as Senior Software Engineer, currently working within a 6-member team delivering back-office automation for a global bank, stepping in as acting lead when needed. Strong track record spanning core Java/Spring Boot development, large-scale ETL modernization (Informatica to Spark), real-time data pipelines (Kafka/Spark/MemSQL), and full-stack web development.

Career Highlights

- ❖ Promoted to Module Lead at Mphasis (Mar 2025) after 3+ years as Senior Software Engineer, recognized for technical delivery and team leadership.
- ❖ Working within a 6-member team delivering end-to-end Loan Restructuring, Commitment Increase, and Unscheduled Fees Processing automation for BNY using Solvas, Snowflake, Spring Boot & Microservices.
- ❖ Migrated 15+ Informatica PowerCenter workflows to Apache Spark for JPMorgan Chase, processing millions of records across S3, flat files, and Oracle tables.
- ❖ Designed real-time data pipelines (Java, Kafka, Spark, MemSQL) for Goldman Sachs Asset & Wealth Management, serving live analytics dashboards via Qlik Sense/Qlik View.
- ❖ 8+ years of enterprise Java backend development across Banking, Retail, and Manufacturing domains with Mphasis and TCS.

Technical Skills

Languages: Java (Core, Advanced, Collections, Eclipse Collections), Scala, Python, JavaScript, C#, HTML, CSS

Frameworks: Spring Boot, Spring Cloud, Spring Batch, Microservices, REST API, Apache Spark, Apache Kafka, Angular, Node.js

Databases: Oracle SQL, Microsoft SQL, MySQL, Snowflake, MemSQL (Distributed DB)

Cloud & AI: Snowflake Dynamic Tables, Generative AI, Agentic AI, MCP (Model Context Protocol), App Engine, Splunk, Windsurf, Claude, ChatGPT

DevOps/Tools: GitLab, GitLab CI/CD, Bitbucket, IntelliJ, Postman, JIRA, Swagger, WinSCP, SQL Developer, Informatica PowerCenter

Testing: JUnit, Mockito

Methodology & Visualization: Agile (Scrum/Sprint), Waterfall, Qlik Sense/Qlik View, Chart.js, D3.js

Experience

Mphasis — Module Lead (Mar 2025 – Present) | Senior Software Engineer (Feb 2022 – Mar 2025) Feb 2022 – Present

Bank of New York (BNY) – Loan Restructuring, Commitment Increase & Fees Processing

Jun 2024 – Present

Role: Senior Software Engineer / Module Lead • Team Size: 6 Members

Tech Stack: Java, Spring Boot, Spring Cloud, Microservices, Microsoft SQL, Solvas, Snowflake, Swagger, App Engine, Splunk, JUnit, Mockito, GitLab CI/CD, Angular UI, Eclipse Collections, Generative AI, Agentic AI, MCP

Project Overview: Automated back-office Loan Restructuring, Commitment Increase, and Unscheduled Fees Processing operations for BNY — replacing what was previously a fully manual, Ops-user-driven transaction process with web applications and automated schedulers built on Solvas and Snowflake dynamic tables.

- ❖ Built Loan Restructuring and Commitment Increase as web applications, enabling Ops staff to execute workflows with minimal manual effort and reducing processing time significantly.
- ❖ Developed automated schedulers for Unscheduled Fees Processing, IPGenerate, and Spread Processing, reading third-party data loaded into Snowflake dynamic tables.
- ❖ Followed established coding standards and used Eclipse Collections for optimized, memory-efficient data structure handling in high-volume processing logic.
- ❖ Leveraged Agentic AI and MCPs for deep data processing, automated bug detection, and CI/CD deployment automation, cutting release cycle effort.
- ❖ Conducted end-to-end production releases including stakeholder sign-offs, QA validation, and post-release monitoring via Splunk and Wallboard.

- ❖ Support sprint planning, story assignment, and backlog grooming for a 6-member team, stepping in as acting lead when the primary lead is unavailable.
- ❖ Serve as a liaison between the Project Owner, Solution Architect, and Ops business users, aligning scope and gathering edge-case requirements.
- ❖ Participate in cross-pod knowledge-sharing sessions, helping other teams with technical blockers and integration guidance.

JPMorgan Chase – DIT & DCM (Data Integration & Capital Markets)

Apr 2023 – May 2024

Role: Senior Java / Spark Developer

Tech Stack: Java, Apache Spark, Oracle SQL, Informatica PowerCenter, AWS S3, Flat Files

Project Overview: Large-scale migration of legacy Informatica PowerCenter ETL workflows to modern Java + Apache Spark data pipelines, enabling scalable, maintainable data processing for JPMorgan's Capital Markets data infrastructure.

- ❖ Migrated 15+ Informatica PowerCenter workflows to Java/Spark, improving pipeline scalability and reducing maintenance overhead.
- ❖ Implemented data ingestion from Oracle tables, flat files, and CSV sources, applying Spark transformations and writing output to target tables or S3 locations.
- ❖ Designed reusable Spark transformation libraries, reducing per-workflow development time for new migration tasks.
- ❖ Collaborated with data architecture teams to validate pipeline output accuracy against Informatica benchmark runs.

Goldman Sachs – Asset & Wealth Management

Feb 2022 – Mar 2023

Role: Senior Software Engineer – Data Engineering

Tech Stack: Java, Scala, Spring Boot, Apache Kafka, Apache Spark, MemSQL (Distributed DB), MySQL, Python, Qlik Sense, Qlik View

Project Overview: Built high-throughput data integration pipelines that ingested third-party vendor data into MemSQL, a distributed in-memory database, and exposed live analytics through interactive Qlik Sense/Qlik View dashboards for the Asset & Wealth Management division.

- ❖ Designed and developed end-to-end data pipelines using Java, Scala, Kafka, and Spark, ensuring reliable, real-time data flow into MemSQL's distributed architecture.
- ❖ Monitored pipeline health and implemented data quality checks to maintain accuracy of analytics dashboards consumed by financial analysts.
- ❖ Built interactive dashboards and charts in Qlik Sense/Qlik View to visualize wealth management metrics.
- ❖ Enhanced existing Spring Boot REST APIs with new features aligned to evolving business requirements.
- ❖ Modified Python scripts to support updated data ingestion logic based on third-party vendor changes.

Tata Consultancy Services (TCS) — System Engineer (Oct 2020 – Jan 2022) | Assistant System Engineer (Mar 2019 – Oct 2020)

Mar 2019 – Jan 2022

Location: Noida, Uttar Pradesh, India

Walgreens Boots Alliance – Space & Floor Planning

Role: Java Developer & L2 Support

Tech Stack: Core Java, Spring Boot, MySQL, Oracle SQL, JDA Space/Floor Planning, C#

Project Overview: Developed a comprehensive Space/Floor Planogram Management System for Walgreens retail stores, enabling store personnel to design, manage, and optimize store layouts to maximize product visibility and profitability.

- ❖ Analyzed requirements and developed new web applications and batch jobs for store space planning workflows.
- ❖ Troubleshooted and resolved performance bottlenecks in Java applications, improving response times for retail planning tools.
- ❖ Provided L2 support, resolving production issues and responding to store personnel queries with SLA-compliant turnaround.
- ❖ Promoted Agile best practices across the team, improving sprint predictability and cross-functional collaboration.

Shree Cement Limited – Internal Process Automation (In-built)

Sep 2017 – Mar 2019

Role: Graduate Engineering Trainee – Full Stack Developer • Location: Ajmer, Rajasthan, India

Tech Stack: Core Java, HTML, CSS, JavaScript, AJAX, MySQL, Oracle SQL, Chart.js, D3.js

Project Overview: Built custom internal web applications to digitize and automate Shree Cement's internal operational processes, improving workforce productivity and replacing manual reporting with interactive data visualizations.

- ❖ Gathered and formalized business requirements, translating them into technical specifications and project plans.
- ❖ Built full-stack web applications from scratch (Core Java backend + HTML/CSS/JS frontend) covering the end-to-end SDLC.
- ❖ Developed interactive data visualization dashboards using Chart.js and D3.js, replacing manual Excel reports.
- ❖ Collaborated with QA and business users through testing cycles to ensure production-ready quality.

Education

B.Tech, Computer Science & Engineering

Government Engineering College

Ajmer, Rajasthan

2013 – 2017

Certifications

- ❖ Data Structures & Algorithms Training — GeeksforGeeks (Jun 2021)
- ❖ System Design Training — GeeksforGeeks (Apr 2021)
- ❖ React.js Essential Training
